Minimum Recommended Airspaces

If you have a cupboard above the refrigerator, recommended minimum clearance at the top of the refrigerator increases to 90mm. Allow a minimum of 10mm clearance above the hinge cover.

Please note: Doors are designed to sit proud of cabinetry (not flush).

When positioned in a corner area, clearance of at least 455mm on the hinge side will allow the doors to open enough to enable the removal of bins and shelves. This required clearance increases to 550mm for those models with telescopic slide-out bins.
